ALBERT JESÚS BERMÚDEZ NORIEGA

Multimedia Engineer · Bots, automation and custom software
Cúcuta, Colombia · Open to remote work - +57 320 518 3625 - albertbermudez31@gmail.com
Portfolio: albert-3105.github.io - GitHub: github.com/albert-3105

PROFILE

Multimedia Engineer (Universidad Simón Bolívar). I build bots, automations and software that make teams' work easier. I work across code, data and design: I find the tasks people repeat by hand and turn them into tools that are simple to use. Python, JavaScript/Node.js, Google Apps Script, n8n, REST APIs, webhooks and Docker; Google Sheets and Looker Studio for data; Adobe Suite for design. Strong in problem solving, analytical thinking, creativity and teamwork. Spanish (native), English (B1).

EXPERIENCE

Sisbén Cúcuta - City of Cúcuta (public citizen-service office) Jan 2026 - present
Systems Engineer

- Built S.I.S.I, the office's WhatsApp chatbot (Meta Cloud API): data consent, registration, status lookup, PDF certificates, 8-option menu and handoff to human agents with business hours.
- Built an agent panel inside WhatsApp: new-case alerts, a chat mode that mutes the bot, and one-message case closing.
- Built the help desk: emails, a web form and field forms become numbered tickets with automatic WhatsApp alerts (Apps Script, n8n, WAHA).
- Built a central data pipeline that merges survey files, field forms, call-center and national data every morning and feeds 4 Looker Studio dashboards.
- Built a Python/Playwright RPA robot that assigns survey requests in batches in a government web app and re-verifies the selection before confirming.
- Built the office appointment queue in Node.js: 14-day booking, daily cap, ID-based scheduling rule and Google Sheets sync.
- Automated the monthly report sent to the national planning department (DNP).
- Built forms and upload tracking for supervisors and field surveyors.
- Run the automation server (Linux, Docker, n8n, WAHA) with secure remote access via Tailscale.
- IT support for staff and equipment.

Digital Forge 2026 - present
Co-founder

- Custom software and automation for clients.
- Brand, multilingual website (Astro) and marketing.

Lovol Dec 2025 - Feb 2026
Marketing Director

- Led the graphic design and video team.
- Planned social media content (scripts, video ideas, shoots) in Trello.
- Ran Meta Ads campaigns and the business profile on Google Maps and Waze.
- Results: +204% Instagram growth, 900+ TikTok followers and 50 leads.

Ascontrif Empresarial Jan 2025 - Dec 2025
Multimedia Engineer, Development, Innovation and Design

- Digital solutions to improve internal processes.
- Data processing and reporting.
- Task automation and systems integration.
- Support for data-driven digital marketing.

Freelance Jan 2024 - Jun 2025
Developer

- Python bots for social media.
- Twilio integrations for WhatsApp and SMS.
- Websites and web apps with HTML, CSS and JavaScript.
- Flask servers and REST APIs.

Ministry of Culture of Colombia Aug 2023 - Dec 2023
Communications intern, Heritage and Memory Department

- Graphic pieces for digital and print media.
- Website updates and interface design.
- Set up SharePoint routing so emails reach each department; proposed a UX/UI redesign of the website.
